

Reincarnation by Gary Bate

I write because I want to make an important difference in the lives of common people like myself.

I'm going to talk about reincarnation because nobody else goes there and there's good reason for that. It is the most important understanding and hopefully you'll see why in a few moments...

Every reference to it got removed at the Council of Nicaea in 325 AD And there's good reason for that too.

If you replace the choice of a continuum with a Heaven & Hell, then you control the masses...

The people live in fear and they die in fear of the unknown. A deliberate ploy to control.

“There's certain things that you cannot know” is utter rubbish!

Reincarnation is like the elephant in the room that everyone has been programmed not to see.

But why?

A constant supply of sustenance goes to the grave every day and this is what they preserved in 325.

You are already in the Light, because you are here in the physical manifestation of it. You are where you are equal to consciously. You leave here and you go there and you leave there and you come back here – why?

You are under the directive of your Soul, which was designed by your Spirit. Your Soul wants you to get all of the wisdom that's available from this Last Kingdom. There is no resolution for your Soul in the Light; the resolution is here in physicality. So the Light is just your temporary abode, because your Soul will push you back here for its completion.

You leave a legacy in this image and you end up back here with a dummy in your mouth!

You come back here with no memories because you have been nothing more than an energetic food source for the 'Lords in the Light'.

But if you knew this, like you do now, then you'd find the way out of this Light trap. That's why they removed all references to it in 325.

You can only go to where and what you know and that's the Light and the physical manifestation of it - this World. The consciousness there is an exaggerated form of exactly the same level of consciousness here...

You cannot evolve yourself unless you understand and accept reincarnation, because without it this life makes no sense. Noboby is waiting for you – they've got better things to do...

Genetics are a mindset. It's how your encumbrances travel with you until you own them as wisdom.

You are always born to the best genetic match for you and many stay in the same families for many lifetimes because of this reason ~ Gary Bate.
